Tests may be powered (static, dynamic and/or monitored) or unpowered

Category	Components	PCBs/Assemblies	Systems
Thermal Stress Screening		•	•
Vibration Stress Screening		•	•
Burn-in/Life Test	•	•	•
Thermal Cycling	•	•	•
Thermal Shock	•	•	
High Temperature Soak	•	•	•
Humidity	•	•	

Sharetree offer an expanding range of Environmental Stress Screening (ESS), Burn-In, Thermal and Vibration test facilities for customer hire. They are available to meet short-term requirements, urgent capacity needs, or temporary manufacturing overloads.

These systems are ideal to enable the potential benefit of HALT/HASS, ESS or Burn-In to be evaluated before committing to permanent facilities, thus avoiding the risk of over (or under) specification of expensive capital equipment. We will be pleased to advise on appropriate test methods from over 25 years experience in this field.

The categories of equipment available are shown above. Full specifications can be provided on request.

Systems may be installed in your factory; alternatively they may be used at Sharetree by your own staff or operated by experienced Sharetree staff on your behalf. Sharetree can provide fixtures and set up electrical test configurations to your specific requirements.

We can install your existing equipment in our Test facility and manage it on your behalf using our own staff.

Should you wish to purchase your own facility, a proportion of the hire charges will be offset against the cost. In addition, customised fixtures and test electronics can normally be re-used to minimise start-up costs.

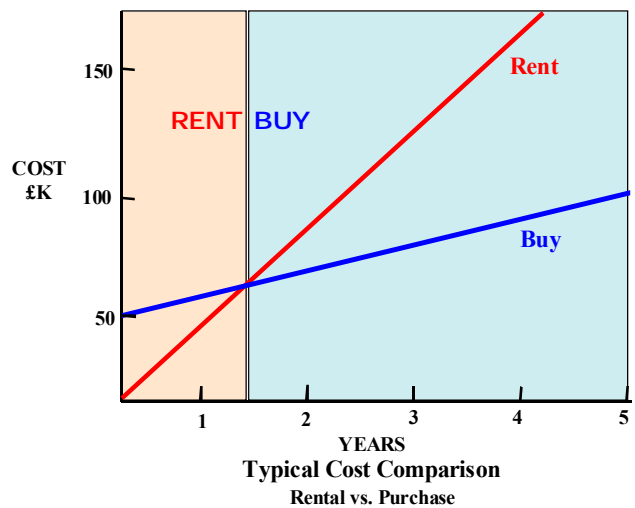

Why not discuss your needs with our team of experienced engineers, with no obligation?

Specifications may vary as part of our policy of continuing product improvement

Rental Economics

Rental makes good economic sense where test facilities are required for a limited period, or when use is infrequent.

In general, it is cheaper to rent where the requirement is less than 18 months, as indicated in the graph above. For short periods (e.g. less than a month) you may prefer to use the facility at Sharetree to save delivery and installation costs.

The cost of owning equipment includes interest on capital and supporting/operating costs over the life of the equipment in addition to the initial purchase price. Rental limits your costs to the period of use.
